

Name _____

A Walk in the Woods

What would we see if we were to go for a walk	12
in the woods in November? What will we see in the	23
tall, tall trees and under the leaves on the ground?	33
If we look up high into the tops of the trees,	44
what do we see? We see so many gray squirrels	54
getting ready for the winter. They do not have time to	65
stop and play. Better hurry, squirrels!	71
If we look down below our feet, what do we see?	82
We see many colored leaves on the ground. Not too	92
many trees keep their leaves for the winter. We can	102
also see acorns and pinecones under the leaves. It must	112
be fall!	114
Will you take a walk with me in the woods in	125
November? We can look for other things in the trees	135
and on the ground.	139
