# Number Recognition and Counting Practice

Numbers 1-9

The following pages are meant to be used for independent practice for handwriting, counting, and number recognition. Children may select which thematic pictures they would like to assemble on the "Show me" mats. The full color pages may be reproduced on card stock and laminated for durability and then used in large or small math groups or as a whole class SMARTBoard™ lesson.

# Counting picture cards to use with "Show me" mats.

Reproduce the counting picture cards on cardstock and laminate for durability. Duplicate multiple copies so that your children have choices about which pictures they want to use on the "Show Me" mats. Cut out the pictures on the dashed lines and store in an envelope along with the "Show Me" mats. This activity will also promote oral language skills when children work in pairs to find and count out enough matching pictures to go with the numerals on the mats.

# Number Recognition and Counting Practice

Numbers 1-9

The following pages are meant to be used for independent practice for handwriting, counting, and number recognition. For differentiated instruction teachers may choose to have children write addition and subtraction facts on the "Show me" pages. Children may also choose which thematic pictures they would like to draw on those pages or follow oral directions from the teacher.
