

Snap That Sound!

(Beginning Consonant Sounds)

Directions:

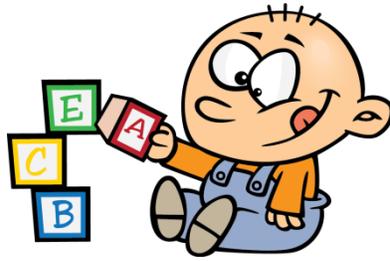

Download, print in color on cardstock and laminate for durability. You may want to mount them on heavy poster board before laminating. To make the activity self-checking, place a sticker on the back to designate correct answers.

Children use old fashioned clothespins and "snap" them onto the pictures that have the correct sound/symbol match. This is good for phonemic awareness, but also for fine motor skills needed for pencil grip and emergent writing.
